EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Paul Sewell on 11/14/10.

The application has been amended as follows:

In the claims:

In claim 2, line 1, after the phrase "wherein said" insert the word "first".

In claims 30 and 32, line 2, after the phrase "of the" insert the word "second".

The following is an examiner's statement of reasons for allowance:

As to claims 1 – 3, 5, 21 – 22, 30 and 34, the prior art fails to show an LED light source for emitting illumination light with a plurality of light-emitting diodes mounted on the first reflecting surface, the plurality of light-emitting diodes including light-emitting diodes of different colors, the plurality of light-emitting diodes being placed radially such that a center axis of a light-emitting diode that extends through opposite end surfaces of the diode merges with center axes of other diodes at a single point; a single reflector, having a substantially rectangular shape in plan perpendicular to a light-emitting direction of the LED light source and having second reflecting surfaces formed on internal side surfaces; and a claw extending from the single reflector for mounting the

single reflector on the circuit board, the claw having a horizontal arm that extends away from an external side surface of the single reflector in a horizontal direction. These features taken together with the other limitations of the claim renders the claims allowable over prior art.

As to claims 6, 10, 25, 31 and 36, the prior art fails to show an LED light source for emitting illumination light with a plurality of light-emitting diodes mounted on the circuit said circuit board, the plurality of light-emitting diodes including light-emitting diodes of different colors, the plurality of light-emitting diodes being placed radially such that a center axis of a light-emitting diode that extends through opposite end surfaces of the diode merges with center axes of other diodes at a single point; a single reflector, having a substantially rectangular shape in plan view and having reflecting surfaces, for reflecting ahead the light emitted from said LED light source, said single reflector being mounted directly on the circuit said circuit board; and a claw extending from the single reflector for mounting the single reflector on the circuit board, the claw having a horizontal arm that extends away from an external side surface of the single reflector in a horizontal direction, a first end of which being attached directly to the external side surface of the single reflector. These features taken together with the other limitations of the claim renders the claims allowable over prior art.

As to claims 23, 32 and 38, the prior art fails to show a first reflecting surface for reflecting light, formed on a circuit board; an LED light source for emitting illumination light with a plurality of light-emitting diodes mounted on the first reflecting surface, the plurality of light-emitting diodes including light-emitting diodes of different colors, the

plurality of light-emitting diodes being placed radially such that a center axis of a light-emitting diode that extends through opposite end surfaces of the diode merges with center axes of other diodes at a single point; a single reflector, having a substantially rectangular shape in plan perpendicular to a light-emitting direction of the LED light source and having second reflecting surfaces formed on internal side surfaces, the single reflector defining only a single opening, such that said only a single opening surrounds only the plurality of light-emitting diodes, and said reflector having an opened rear thereof closed by the first reflecting surface when mounted on the first reflecting surfaces; and a claw extending from the single reflector for mounting the single reflector on the circuit board, the claw having a horizontal arm that extends away from an external side surface of the single reflector in a horizontal direction. These features taken together with the other limitations of the claim renders the claims allowable over prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Reena Aurora whose telephone number is 571-272-2263. The examiner can normally be reached on Monday - Friday, 8:00 - 4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Patrick Assouad can be reached on 571-272-2210. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
